

CERTIFICATE OF CONFORMANCE: FOOD CONTACT

UVAS Quality® Grape Guard manufactured by Imal SpA, located at Los Canteros 8724, La Reina, Santiago, Chile, is safe for food contact and complies with the following EU Directives and Regulations:

Regulation (EC) N° 1129/2011 which amends **Directive 95/2/EC** on food additives other than colors and sweeteners and authorizes the use of SO₂ in the EU on Table Grapes, Lychees and Blueberries. The correct usages of **UVAS Quality® Grape Guard** will not lead to Sulphite residues on Table Grapes greater than 10 ppm.

Directive 2008/84/EC the active ingredient Sodium Meta Bisulphite (E223), used in the manufacture of **UVAS Quality® Grape Guard**, complies with the purity criteria on food additives other than colors and sweeteners set out in this directive.

The rules of **Regulation (EC) N° 1935/2004** of the European Parliament on materials and articles intended to come into contact with food and repealing **Directives 80/590/EEC** and **89/109/EEC**.

Directive 94/62/EC on packaging and packaging waste, regarding the presence of heavy metals (lead, cadmium, mercury and hexavalent chromium) in packaging materials.

UVAS Quality® Grape Guard is registered with the US Environmental Agency (EPA) for post-harvest use on Table Grapes **EPA REGISTER No 37842-1** and **EPA ESTABLISHMENT No 37842-CH-001** located in an industrial zone without radioactivity. It is registered on SENASA Peru under ATIP N° 002.

All raw materials used in the manufacture of **UVAS Quality® Grape Guard** are safe for contact with Foodstuffs and comply with the requirements of FDA specified under Federal Code of Regulations (CFR), title 21 sections N°176.170 and N°176.180 for products must be in direct or no direct contact with food. The printing ink used complies with GMP established by European Printing Ink Association.

Raw materials derived from cellulose and mechanical pulps suppliers are FSC certified (Forest Stewardship Council) and are 100% recyclable. Our entire production process considered complete traceability for raw materials, suppliers and finished products.

We certify that the plastics used in the manufacture of **UVAS Quality® Grape Guard** are Polyethylene film suitable for food packaging/contact and comply with the relevant regulations. All plastics used in the manufacture of **UVAS Quality® Grape Guard** contain at least 30% post-consumer plastic.

We also certify that **UVAS Quality® Grape Guard** contain none of the following compounds: Chlorinated polymers such Polyvinyl Chloride (PVC) or Polyvinylidene Chloride (PVDC), Bisphenol A, Fluorinated compounds such as Perfluorooctanoic acid (PFOA) and perfluoroalkyl or polyfluoroalkyl (PFAS).
